Features

- Industrial-grade LED LCD with a lifespan of 50,000 hours
- Modular design enables flexible configuration of video interfaces (HDMI, DP) and long distance transmission (iLink)
- Display modules available in various sizes with projected capacitive or 5-wire resistive touch control
- Front-facing iKey for OSD buttons
- Capability of controlling 2 modular PCs simultaneously via FPM-M700 I/O modules
- Supports Picture-in-Picture technology
- IP66-rated front panel protects against water and dust
- Supports a signal transmission distance of up to 100 m with iLINK technology

Introduction

The modular industrial monitors, constructed by the powerful combination of Display Modules, Monitor Boxes and I/O Modules, extend the functionality of classical industrial monitors. The flexible modularized design, equipped with the powerful FPM-M700 I/O modules, allows users to change the video interface according to their usage demands. Additionally, unlike traditional industrial touch monitors that can only support controllers in a one-to-one capacity, the FPM series monitors can support two controllers simultaneously. Moreover, with the inclusion of Picture-in-Picture (PiP) technology, users can easily change the display layout and switch between units that need operating.

The FPM-7002 model also supports Advantech's iLINK technology, a long-distance data transmission solution. This technology is designed to resolve issues of touch signal degradation. The optional Wi-Fi and NFC features also allow users to flexibly configure the monitor systems.
