Introduction

Advantech UBX-010RC is an Ultra-compact ARM64 based Mini PC that is used for edge computing in smart city, especially for retail applications. With Built-in Google Mobile Service (GMS), UBX-010RC ensures that Android devices have access to Google's ecosystem and services, including the Google Play Store, and are equipped with advanced security features. Furthermore, it provides AI inference ability in edge side thanks to a 6TOPS NPU Integrated. And same as other UBX series products, X-type thermal isolation top cover makes it user friendly for installation and system touch.
